

VOTRE CINÉMA

Creator
of REAL
Private
Cinema Rooms...

The expert

VOTRE CINEMA

is specialised in the conception and realisation of Private Cinema Rooms, far beyond the standards of traditional home cinema. We export our unparalleled expertise throughout France, Europe and internationally.

With more than 250 high-end installations since 2002, today we are the expert in our field.

An unparalleled expertise

OUR DESIGN OFFICE

office systematically writes up a project file (around 70 pages) detailing all the key points of the cinema: Technical plans in accordance with THX standards, layout, 3D modeling, design, acoustic simulation, technical recommendations, choice of materials and a detailed budget.

Our defining characteristic is that we use the same techniques and certifications as a professional cinema (acoustic ceiling and walls, acoustically transparent screen, real cinema speakers, panoramic projection in Cinemascope, home automation, and also a 4D element with the movement of the armchairs...).

Turnkey Service

FROM THE CONCEPTION TO THE REALISATION WITHOUT SUBCONTRACTING,

One sole representative follows the ensemble of your project.

Only our teams will participate in the installation. In this way we can guarantee the final result.

Our turnkey service includes everything from the top to the bottom: Finishing work, decoration, furniture, technical elements; audio; video; home automation...

Dedicated Room

The acoustic correction represents 80% of the final sound effects. This is the most important link in a Private Cinema Room.

The only approach that can achieve a real cinematic finish.

The 3 key elements of a Private Cinema Room:

- **Aesthetics:** a design that is simple, chic, resolutely modern with perfect finishing touches
- **Acoustics:** the most important element, however often ignored...
- **Technique:** derived from the professional world: 3D audio, Ultra HD 4K imaging, Cinemascope, home automation, 4D...

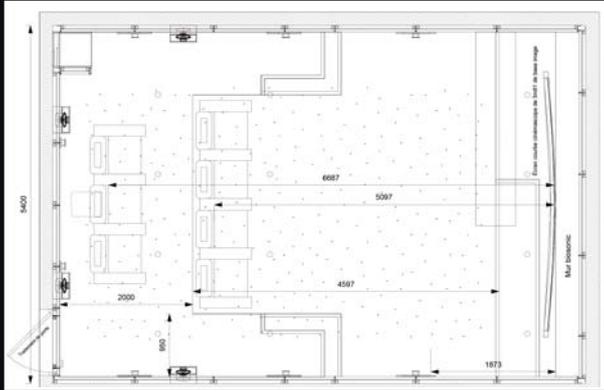

If it is missing one of these 3 elements, we fall back into traditional and mainstream Home Cinema, which is far from having a genuine cinematic finish...

Creating your cinema: our only profession

- 250 high-end cinema realisations
- 20 years of experience
- Work without subcontracting
- **THX** and **isf** certifications
- Design and acoustic Office
- Designs that are classic or modern
- Annual maintenance at all of our clients' homes
- Prestigious references
